Is the case report persuasive?: Yes

Does the case report have explanatory value?: Yes

Does the case report have diagnostic value?: Yes

Will the case report make a difference to clinical practice?: Yes

Is the anonymity of the patient protected?: Yes

Comments to authors:

The new version of the manuscript is significantly better; it includes missing information and elucidates main issues. However, the discussion section could be shortened, being more concise without splitting information. Some stylish and linguistic corrections should be done before final publication.

Quality of written English: Needs some language corrections before being published
