Title: Upper Cervical Intramedullary Spinal Metastasis of Ovarian Carcinoma Case Report and Review of the Literature

Version: 1 Date: 9 December 2010

Reviewer: Bernhard Schaller

If other, please specify:

The authors present a well-written and interesting case report. I have only small changes to suggest:

1) abstract: Should be more structured.
2) Introduction and Discussion should be more focused. Currently, they are too much "book-chapter-like". For example: One may suggest that the reader already knows the differential diagnosis of intramedullary tumors. Or the accompanying steroid-therapy is common sense.
