Reviewer’s report

Title: Prolapsed sigmoid intussusception per Anus in an elderly man: a case report

Version: 2 Date: 11 May 2011

Reviewer: Christopher Young

Which of the following following best describes what type of case report this is?: None

If other, please specify:

The case is uncommon and much better written now. Definitely uncommon in western countries, and good images.

Has the case been reported coherently?: Yes

Is the case report authentic?: Yes

Is the case report ethical?: Yes

Is there any missing information that you think must be added before publication?: No

Is this case worth reporting?: Yes

Is the case report persuasive?: Yes

Does the case report have explanatory value?: Yes

Does the case report have diagnostic value?: No

Will the case report make a difference to clinical practice?: No

Is the anonymity of the patient protected?: Yes

Comments to authors:

I have never seen an intussusception like this in 12 years as a consultant. It just does not occur much where I work and therefore I find it interesting. It will not change practice but it is what it is, and the photos are interesting.

Quality of written English: Acceptable
