Reviewer's report

Title: Contribution of MRI in the diagnosis of talus skip metastases of calcaneus Ewing's sarcoma in child: a case report

Version: 2 Date: 4 May 2011

Reviewer: EL FEZZAZI R REDOUANE

Which of the following best describes what type of case report this is?: Unexpected or unusual presentations of a disease

Has the case been reported coherently?: Yes

Is the case report authentic?: No

Is the case report ethical?: Yes

Is there any missing information that you think must be added before publication?: Yes

Is this case worth reporting?: Yes

Is the case report persuasive?: No

Does the case report have explanatory value?: Yes

Does the case report have diagnostic value?: No

Will the case report make a difference to clinical practice?: Yes

Is the anonymity of the patient protected?: Yes

Comments to authors:
- figures are not reported coherently.
- need figure to see how was the Talus on the CT scan?
- Why not a chest CT scan to see lung's metastasis?
- Immunochemistry is needed to corroborate Ewing's sarcoma.

Quality of written English: Acceptable
