Is the case report ethical?: Yes

Is there any missing information that you think must be added before publication?: No

Is this case worth reporting?: Yes

Is the case report persuasive?: Yes

Does the case report have explanatory value?: Yes

Does the case report have diagnostic value?: No

Will the case report make a difference to clinical practice?: Yes

Is the anonymity of the patient protected?: Yes

Comments to authors:

This is a good case report demonstrating the solution to the problem of short appendix which we came across not frequently. If we take out stoma through umbilicus, this combination become more logical otherwise skin based tube can be used as an alternative to this procedure as popularized by CR Woodhouse.

Quality of written English: Needs some language corrections before being published
