Comments to authors:

1. Since Lymphoma is common in this age group, any clinical finding or investigations were done towards this before orchiectomy? Make a mention in the case report. like no generalized lymphadenopathy or normal CT
2. What is the duration between surgery and metastasis. What chemotherapy is the patient on? How was the patient followed up and how was the mets picked up?
3. SPEP - expand this abbreviation
4. Please highlight on the follow up of these patients with regards to investigations, frequency and duration as the progression is high.
