Reviewer's report

Title: Primary Plasmacytoma of the Testis: A Case Report

Version: 2 Date: 27 June 2011

Reviewer: gokul vignesh kanda swamy

Which of the following following best describes what type of case report this is?: Unexpected or unusual presentations of a disease

Has the case been reported coherently?: Yes

Is the case report authentic?: Yes

Is the case report ethical?: Yes

Is there any missing information that you think must be added before publication?: Yes

Is this case worth reporting?: Yes

Is the case report persuasive?: Yes

Does the case report have explanatory value?: Yes

Does the case report have diagnostic value?: Yes

Will the case report make a difference to clinical practice?: Yes

Is the anonymity of the patient protected?: Yes

Comments to authors:

1. In the end of para 1 in discussion it mentions that 10 yr survival for EP overall is 70%, but in second paragraph it says survival is poor for testicular plasmacytoma which is a type of EP. Are we missing something here - any reason for poor prognosis for testicular plasmacytoma?

2. Can you please mention the follow up you followed for this patient as a guide as there are no definite guidelines.
