Comments to authors:

Some minor revisions to the manuscript are needed. These are mainly language corrections

1. Abstract conclusion emphasize instwad of emphasizing
2. Case presentation second paragraph, fifth line should be periosteal instead of peristal
3. Discussion paragraph 1 line 10 should be an MRI instead of a MRI
4. Author's contribution first line should read MA was responsible for the data collection, consent and was the writer of the manuscript. Third line should read carefully reviewing the article
Quality of written English: Needs some language corrections before being published
