Is the case report ethical?: Yes

Is there any missing information that you think must be added before publication?: No

Is this case worth reporting?: Yes

Is the case report persuasive?: Yes

Does the case report have explanatory value?: Yes

Does the case report have diagnostic value?: Yes

Will the case report make a difference to clinical practice?: No

Is the anonymity of the patient protected?: Yes

**Comments to authors:**

Thank you for you providing this interesting case. I suggest authors to revise and provide some detailed data in this case. For example, in the description of lab test, author could put additional real test data from laboratory test or a figure to show pleural effusion on the right pulmonary base. In another example, authors said “After such treatment was installed, the patient had significant improvement”. The authors may tell readers after how long time and how the patient was improved.

**Quality of written English:** Acceptable
