Reviewer's report

Title: Myomectomy as a dual risk factor for uterine rupture: rupture with occlusion by intestinal adhesion

Version: 1 Date: 24 July 2011

Reviewer: Kozo Akagi

Which of the following best describes what type of case report this is?: Unexpected or unusual presentations of a disease

Has the case been reported coherently?: Yes

Is the case report authentic?: Yes

Is the case report ethical?: Yes

Is there any missing information that you think must be added before publication?: Yes

Is this case worth reporting?: Yes

Is the case report persuasive?: Yes

Does the case report have explanatory value?: Yes

Does the case report have diagnostic value?: Yes

Will the case report make a difference to clinical practice?: Yes

Is the anonymity of the patient protected?: Yes

Comments to authors:

1) Detailed information is needed about how the myomectomy was performed. The information includes site of myomectomy, laparoscopic or not and febrile morbidity.

2) Gravidity, parity and past history (especially surgical history) of the patient is essential.

Quality of written English: Needs some language corrections before being published
