Reviewer's report

Title: Solitary Splenic Metastasis of a Carcinosarcoma: A Case Report

Version: 1 Date: 13 July 2010

Reviewer: Khadra Galaal

Which of the following following best describes what type of case report this is?: Unexpected or unusual presentations of a disease

Has the case been reported coherently?: Yes

Is the case report authentic?: No

Is the case report ethical?: Yes

Is there any missing information that you think must be added before publication?: Yes

Is this case worth reporting?: Yes

Is the case report persuasive?: Yes

Does the case report have explanatory value?: Yes

Does the case report have diagnostic value?: Yes

Will the case report make a difference to clinical practice?: No

Is the anonymity of the patient protected?: Yes

Comments to authors:

This is an interesting presentation of a splenic metastases of carcinosarcoma. However I suggest two inclusions

1. It is not clear if the primary ovarian cancer that this patient was treated for in 2001 was indeed ovarian carcinosarcoma or epithelial carcinoma i.e is this new presentation or recurrence.
2. The discussion of such a case should include the value of adjuvant treatment
