Reviewer’s report

Title: Diffuse bronchiolitis pattern on CT scan as a presentation of pulmonary tumor thrombotic microangiopathy: a case report

Version: 3 Date: 12 September 2011

Reviewer: ELIE G. DIB

Comments to authors:

I find the manuscript very informative and well written. I would recommend that the authors add to the abstract the type of the pelvic malignancy. I would also ask the authors to add to the abstract a statement that lists why this report is rare. They have explained this point very convincingly in the discussion.
