Is the case report ethical?: Yes

Is there any missing information that you think must be added before publication?: Yes

Is this case worth reporting?: Yes

Is the case report persuasive?: Yes

Does the case report have explanatory value?: No

Does the case report have diagnostic value?: No

Will the case report make a difference to clinical practice?: No

Is the anonymity of the patient protected?: Yes

Comments to authors:

This is an interesting case report, that needs to be revised and resubmitted. There are major grammar, syntax and terminology errors, and even though it is a rare case of PMDS, a few publications have been recently made on this topic. The authors are encouraged to justify what their case report would offer in the already established knowledge in the PMDS.

Quality of written English: Needs some language corrections before being published
