Is this case worth reporting?: Yes

Is the case report persuasive?: Yes

Does the case report have explanatory value?: Yes

Does the case report have diagnostic value?: Yes

Will the case report make a difference to clinical practice?: Yes

Is the anonymity of the patient protected?: Yes

Comments to authors:

In this case report the authors present PMDS, a rare form of male pseudohermaphroditism characterized by the presence of Mullerian duct structures in an otherwise phenotypically, as well as genotypically, normal male.

If there are any preoperative images (Ultrasonography, CT or MRI) that would be very useful.

Quality of written English: Acceptable
