Reviewer’s report

Title: Anomalous left coronary artery from the pulmonary artery (ALCAPA) presenting with sudden death in an octogenarian: A case report

Version: 6 Date: 11 October 2011

Reviewer: Katerina Linhartova

Which of the following following best describes what type of case report this is?: Unexpected or unusual presentations of a disease

Has the case been reported coherently?: Yes

Is the case report authentic?: Yes

Is the case report ethical?: Yes

Is there any missing information that you think must be added before publication?: Yes

Is this case worth reporting?: Yes

Is the case report persuasive?: No

Does the case report have explanatory value?: Yes

Does the case report have diagnostic value?: No

Will the case report make a difference to clinical practice?: Yes

Is the anonymity of the patient protected?: Yes

Comments to authors:

It should be stated that the cause-effect relationship between ALCAPA and VF in this old patient cannot be definitely proved. Is there any evidence on her previous LVEF?

Several language mistakes should be corrected:
prolonged resuscitation
hemodynamically
led a sedentary life
hypokinetic
MR means mitral regurgitation?
discharged home in stable situation

**Quality of written English:** Needs some language corrections before being published
