Does the case report have explanatory value?: Yes

Does the case report have diagnostic value?: Yes

Will the case report make a difference to clinical practice?: Yes

Is the anonymity of the patient protected?: Yes

Comments to authors:

The manuscript is well written and reporting a rare case of vocal cord palsy after Vincristine treatment. The authors did mention that (A nerve conduction study of the larynx was not performed) , but have not highlighted why? I would think that this information has to be added for sake of completion.

Quality of written English: Acceptable
