Reviewer’s report

Title: A pediatric case report of vocal cord palsy after vincristine treatment: inefficacy of glutamic acid in prevention of relapse and review of the literature.

Version: 1 Date: 18 January 2012

Reviewer: Mohamed Fahmy

Which of the following following best describes what type of case report this is?: Unreported or unusual side effects or adverse interactions involving medications

Has the case been reported coherently?: Yes

Is the case report authentic?: Yes

Is the case report ethical?: Yes

Is there any missing information that you think must be added before publication?: Yes

Is this case worth reporting?: Yes

Is the case report persuasive?: Yes

Does the case report have explanatory value?: Yes

Does the case report have diagnostic value?: Yes

Will the case report make a difference to clinical practice?: Yes

Is the anonymity of the patient protected?: Yes

Comments to authors:

The authors need to provide more investigations to document this complication, they could provide an illustration or a photography of the endoscopy done showing the vocal cord paralysis.

Quality of written English: Acceptable
