Is the case report persuasive?: Yes

Does the case report have explanatory value?: Yes

Does the case report have diagnostic value?: Yes

Will the case report make a difference to clinical practice?: Yes

Is the anonymity of the patient protected?: Yes

Comments to authors:

Thank you for the submission.
The following corrections have to be made before publication:
1. Abbreviations should be spelled out at first appearance, and be avoided in Abstract.
2. The Abstract should briefly summarize the presenting case and, more importantly, the proposed concept. The case description in the abstract should be shorter (please omit "Italian hospital" etc.).
3. Please omit the informed consent signing issue in the Introduction.
4. Please note that MMSE is a trade name and protected in copyright regulations.
5. The Conclusions are going too far. You should conclude only from the one case presented. For the presented conclusions – a large-scale study should be conducted, of course.

6. Results should be summarized within Tables.

7. Figure referral should appear within parentheses.

8. References list should be formatted according the Journal style (Please see Authors Guidelines).

9. Figure Legends should be more descriptive.

10. Editing is needed. Sentences and paragraphs should be shorter.

**Quality of written English:** Needs some language corrections before being published
