Is the anonymity of the patient protected?: Yes

Comments to authors:

Dear Editor

the authors described a case of "Precocious Puberty in a 4 year Old Egyptian Girl Caused By Mixed Germ Cell–Sex Cord- Stromal-Non Gonadoblastoma Tumour of the Ovary."

This is an interesting and well documented case.

Moreover the text contain some grammar errors and an excessive number of histologic figures and very poor quality. Two H&E photos and one or two immunohistochemical figures of good quality are sufficient.

Quality of written English: Needs some language corrections before being
published
