Reviewer’s report

Title: Densities in the left innominate vein after removal of an implantable venous device: the importance of a differential diagnosis

Version: 2 Date: 7 March 2012

Reviewer: Mohamed Fahmy

Which of the following following best describes what type of case report this is?: Unreported or unusual side effects or adverse interactions involving medications

Has the case been reported coherently?: Yes

Is the case report authentic?: Yes

Is the case report ethical?: Yes

Is there any missing information that you think must be added before publication?: Yes

Is this case worth reporting?: Yes

Is the case report persuasive?: Yes

Does the case report have explanatory value?: Yes

Does the case report have diagnostic value?: Yes

Will the case report make a difference to clinical practice?: Yes

Is the anonymity of the patient protected?: Yes

Comments to authors:

In the conclusion there is no need to mention references and previous similar case, and I think the last 4 lines in the conclusion need revision.
