Is the case report ethical?: No

Is there any missing information that you think must be added before publication?: Yes

Is this case worth reporting?: No

Is the case report persuasive?: Yes

Does the case report have explanatory value?: No

Does the case report have diagnostic value?: No

Will the case report make a difference to clinical practice?: Yes

Is the anonymity of the patient protected?: Yes

Comments to authors:

Which the authors think contributed to the resolution of chylous ascites after the delivery, low fat diet or termination of pregnancy?

If pregnancy has some relationship with the development of chylous ascites, are there any differences of the ingredients between those in non-pregnant women and those in pregnant women?

Quality of written English: Acceptable
