Reviewer’s report

Title: The key to managing the risk of cancer in Cowden Syndrome: a case report

Version: 8 Date: 7 February 2012

Reviewer: Lee Shulman

Which of the following best describes what type of case report this is?: Presentations, diagnoses and/or management of new and emerging diseases

Has the case been reported coherently?: Yes

Is the case report authentic?: Yes

Is the case report ethical?: Yes

Is there any missing information that you think must be added before publication?: No

Is this case worth reporting?: Yes

Is the case report persuasive?: Yes

Does the case report have explanatory value?: Yes

Does the case report have diagnostic value?: Yes

Will the case report make a difference to clinical practice?: Yes

Is the anonymity of the patient protected?: Yes

Comments to authors:

This is an interesting case of Cowden syndrome, but requires considerable revision into proper scientific English. With revision, this would present important information concerning one of the less frequent cancer predisposition syndromes.

Quality of written English: Needs some language corrections before being published

Declaration of competing interests:
