Comments to authors:

This manuscript entitled, "Marie and Sainton disease" reports a asian girl with Cleidocranial Dysplasia. The followings are comments to the manuscript.

1. Why did authors decided the present title, "Marie and Saiton disease".

2. It is essential to provide more information (text, oral pictures and shema) on how authors treated for traction of the permanent teeth by using the lingual arch. Also, the treatment outcome has to be presented along with the treatment progress.

Quality of written English: Not suitable for publication unless extensively edited
