Does the case report have diagnostic value?: Yes

Will the case report make a difference to clinical practice?: No

Is the anonymity of the patient protected?: Yes

Comments to authors:

This paper describes Mycoplasma hominis brain abscess following traumatic brain injury.

1. When did you change this patient’s antibiotics to doxycycline? You should describe the hospital day when appropriate antibiotics did start (page 3, line 62).

2. Table.1: You describes that a man caused post-partum infection. Is this correct?
   No.3 1997 22 y/o M Post-partum 8 days CFX + Metro

3. Table.1: You should describe patient’s outcomes in Table.1. It would help to understand the prognosis for patients with M. hominis infection is usually better with earlier and proper treatment.
