Reviewer's report

Title: Mycoplasma hominis brain abscess after a head trauma: A case report

Version: 2 Date: 8 May 2012

Reviewer: Guido Gonzalez

Comments to authors:

The authors describe a case-report of M. hominis brain abscess after head trauma. The case is concisely and clearly described, and the ID of the organism was confirmed using 16S sequencing. The discussion is brief but covers the major points about M. hominis and appropriately summarizes existing literature on this clinical entity.
