Reviewer’s report

Title: Biepicondylar fracture presenting with dislocation in elbow: a case report

Version: 7 Date: 9 May 2012

Reviewer: Mustafa Isik

Which of the following best describes what type of case report this is?: Unexpected or unusual presentations of a disease

Has the case been reported coherently?: Yes

Is the case report authentic?: Yes

Is the case report ethical?: Yes

Is there any missing information that you think must be added before publication?: No

Is this case worth reporting?: Yes

Is the case report persuasive?: Yes

Does the case report have explanatory value?: Yes

Does the case report have diagnostic value?: Yes

Will the case report make a difference to clinical practice?: No

Is the anonymity of the patient protected?: Yes

Comments to authors:

1- the manuscript looks an interesting and rare case presentation but needs some revisions about writing mistakes especially ("fractures of avulsion fractures of" e.g)

2- one more message should be given at last part of manuscript for complete the main consideration ("Orthopaedic surgeons also should bear in mind dislocations in pediatric fractures on joint areas" e.g)

Quality of written English: Needs some language corrections before being published
