Reviewer's report

Title: Acute inflammatory demyelinating polyneuropathy after treatment with pegylated interferon alpha 2a in a patient with chronic hepatitis C virus infection: a case report

Version: 2 Date: 10 April 2012

Reviewer: Bernhard Schaller

Comments to authors:

The authors present an interesting and well-written case report. I have only one suggestion: The discussion part is too long and sometimes full of book-chapter knowledge. Please shorten and focus the discussion part.
