Reviewer's report

Title: Synergism of clinical evaluation and penile sonographic imaging in diagnosis of penile fracture: a case report.

Version: 1 Date: 11 June 2012

Reviewer: Evangelos Mazaris

Which of the following following best describes what type of case report this is?: Other

If other, please specify:

Non-invasive, easy and cheap means of diagnosis for an unusual condition

Has the case been reported coherently?: Yes

Is the case report authentic?: Yes

Is the case report ethical?: Yes

Is there any missing information that you think must be added before publication?: Yes

Is this case worth reporting?: Yes

Is the case report persuasive?: Yes

Does the case report have explanatory value?: Yes

Does the case report have diagnostic value?: Yes

Will the case report make a difference to clinical practice?: Yes

Is the anonymity of the patient protected?: Yes

Comments to authors:

Please explain in more detail how sonourethrography was performed.

In the discussion section please report the diagnostic value of sonourethrography (sensitivity, specificity etc.) and whether it has been described before in penile fracture and also underline the main differences with retrograde urethrogram.
