Reviewer's report

Title: Nonobstructive Hydronephrosis from Social Polydipsia: a case report.

Version: 1 Date: 2 August 2012

Reviewer: Bhavna Bhasin

Which of the following following best describes what type of case report this is?: New associations or variations in disease processes

Has the case been reported coherently?: Yes

Is the case report authentic?: Yes

Is the case report ethical?: Yes

Is there any missing information that you think must be added before publication?: No

Is this case worth reporting?: Yes

Is the case report persuasive?: Yes

Does the case report have explanatory value?: Yes

Does the case report have diagnostic value?: Yes

Will the case report make a difference to clinical practice?: Yes

Is the anonymity of the patient protected?: Yes

Comments to authors:

1. The case report is well written out but needs minor editing for grammar/spellings

2. In addition to cystoscopy and CT scan, was a Lasix renogram undertaken at any point in the clinical course to define the anatomy of obstruction or level of obstruction if any.( before or after the interventions)

3. References: the volume/ issue number should be in bold

4. Figures: Figure D shows both the left and the right kidney- it would be better perhaps to show only the right kidney before and after with the size indicated by arrows.

Quality of written English: Needs some language corrections before being
published
