Reviewer's report

Title: Hypospadias in an Egyptian infant with X linked congenital adrenal hypoplasia: a possible new syndrome.

Version: 1 Date: 21 August 2012

Reviewer: esra ozer

Which of the following following best describes what type of case report this is?: Unexpected or unusual presentations of a disease

Has the case been reported coherently?: Yes

Is the case report authentic?: Yes

Is the case report ethical?: Yes

Is there any missing information that you think must be added before publication?: No

Is this case worth reporting?: Yes

Is the case report persuasive?: Yes

Does the case report have explanatory value?: Yes

Does the case report have diagnostic value?: Yes

Will the case report make a difference to clinical practice?: No

Is the anonymity of the patient protected?: No

Comments to authors:

the authors should state that presented case may be also co-existing clinical situation. Because there is not enough evidence to show the genetical relationship between two clinical disturbances.

There are many syntax errors in the text and English must be improved.

The pictures of the patient are irrelevant and reductant.

Quality of written English: Needs some language corrections before being published
