Is the case report ethical?: Yes

Is there any missing information that you think must be added before publication?: No

Is this case worth reporting?: No

Is the case report persuasive?: Yes

Does the case report have explanatory value?: No

Does the case report have diagnostic value?: No

Will the case report make a difference to clinical practice?: No

Is the anonymity of the patient protected?: Yes

Comments to authors:

This main interest of this case report is to provide interesting MRI images of post infectious cerebellitis.

However, MRI images presented in figure have very low quality resolution and are difficult to interpret

Quality of written English: Needs some language corrections before being published
