Reviewer’s report

Title: Seroma suppression in mastectomy patients - a case report using TissuGlu

Version: 2 Date: 2 January 2013

Reviewer: Thomas Gilbert

Which of the following following best describes what type of case report this is?: Other

If other, please specify:

A new potential indication for an existing product.

Has the case been reported coherently?: Yes

Is the case report authentic?: Yes

Is the case report ethical?: Yes

Is there any missing information that you think must be added before publication?: No

Is this case worth reporting?: Yes

Is the case report persuasive?: Yes

Does the case report have explanatory value?: Yes

Does the case report have diagnostic value?: No

Will the case report make a difference to clinical practice?: Yes

Is the anonymity of the patient protected?: Yes

Comments to authors:

The case is compelling, and the findings are interesting. Although you make no claims, it would be worthwhile to add a statement that this case does not allow for any interpretation of how TissuGlu would function in the presence of a breast implant following mastectomy.

There are a few minor grammatical errors that should be addressed.

1. Introduction, Sentence 4, Remove 'of' between 'factors' and include'.
2. Discussion, Paragraph 2, Sentence 2, 'influence' should be 'influenced'.
2. Discussion, Paragraph 3, Sentence 2, Remove comma after 'having'.

**Quality of written English:** Needs some language corrections before being published
