Reviewer’s report

Title: Endovascular management of spontaneous axillary artery aneurysm--a case presentation and review of the literature

Version: 2 Date: 14 March 2013

Reviewer: Mario Camarda

Which of the following following best describes what type of case report this is?: Unexpected or unusual presentations of a disease

Has the case been reported coherently?: Yes

Is the case report authentic?: Yes

Is the case report ethical?: Yes

Is there any missing information that you think must be added before publication?: Yes

Is this case worth reporting?: Yes

Is the case report persuasive?: Yes

Does the case report have explanatory value?: Yes

Does the case report have diagnostic value?: Yes

Will the case report make a difference to clinical practice?: Yes

Is the anonymity of the patient protected?: Yes

Comments to authors:

I have appreciated the work. They have showed a very interesting and rare case and their therapeutic conclusions must be very helpful. Before publishing i think one more important detail is needed; authors have not explained the time of patient follow-up and i guess it should be clearly expressed in the manuscript.

Quality of written English: Needs some language corrections before being published
