Reviewer's report

**Title:** Amyotrophy in Creutzfeldt-Jakob disease

**Version:** 1 **Date:** 11 April 2013

**Reviewer:** Bernhard Schaller

**Comments to authors:**

The case is very interesting and more than worth to be published. However, the whole case report is too long and sometimes overwhelmed with too much text-book knowledge. I would therefore suggest to shorten the case and focus on what is specific. In addition, I would suggest to make a table with the previously published cases of Amyotrophy in CJD with documentation when in the course the amyotrophy was diagnosed.
