Reviewer's report

Title: Obstructive jaundice; an uncommon presentation of a biliary mucinous cystadenoma

Version: 3 Date: 24 July 2013

Reviewer: Evangelos Felekouras

Which of the following following best describes what type of case report this is?: Other

If other, please specify:

the main feature of this report is the surgical treatment of a liver cystic lesion which are considered by most benign but as this report says are not Radical excision prevents the chance of recurrence and malignant transformation

Has the case been reported coherently?: Yes

Is the case report authentic?: Yes

Is the case report ethical?: Yes

Is there any missing information that you think must be added before publication?: Yes

Is this case worth reporting?: Yes

Is the case report persuasive?: Yes

Does the case report have explanatory value?: Yes

Does the case report have diagnostic value?: Yes

Will the case report make a difference to clinical practice?: Yes

Is the anonymity of the patient protected?: Yes

Comments to authors:

Please add to this report a paragraph of the histology report and make comments of it since every part of the cystic lesion has to be examined to exclude the malignant transformation to cystadenocarcinoma

Please make comments how to avoid misdiagnosis with other type of liver cysts since there are distinctions in the histology of the lesion (the epithelium of the
cyst)
so after reviewing this comments please I woul like to see thst again
thanks
