Reviewer's report

Title: Annular leucocytoclastic vasculitis associated with anti-tuberculous medications: a case report

Version: 2 Date: 22 August 2012

Reviewer: Markus Meissner

Which of the following best describes what type of case report this is?: An unexpected event in the course of observing or treating a patient

Has the case been reported coherently?: Yes

Is the case report authentic?: Yes

Is the case report ethical?: Yes

Is there any missing information that you think must be added before publication?: Yes

Is this case worth reporting?: Yes

Is the case report persuasive?: Yes

Does the case report have explanatory value?: Yes

Does the case report have diagnostic value?: No

Will the case report make a difference to clinical practice?: No

Is the anonymity of the patient protected?: Yes

Comments to authors:

The authors should mention and discuss the work of Cribier et al. and their criteria for annular vasculitis. The authors must apply these criteria to their patient and discuss these results.

Quality of written English: Not suitable for publication unless extensively edited
