Is the case report persuasive?: Yes

Does the case report have explanatory value?: Yes

Does the case report have diagnostic value?: Yes

Will the case report make a difference to clinical practice?: No

Is the anonymity of the patient protected?: Yes

Comments to authors:

very interesting clinical case, however, he emphasized the difficulty of diagnostic of hepatic hilum tumor and to obtain histological confirmation. the authors had the chance to remove specimen tumor unintentionally which is not always easy in practice. and in the discussion it was necessary to develop this specificity of the hepatic hilum tumor and encourage practitioners to think about this rare event diagnosis and not to condemn the patients and give them a therapeutic. Forever luck and of course with multidisciplinary concertation
