Is the anonymity of the patient protected?: Yes

Comments to authors:

Page 2. In Abstract, correct „osteotomy“, which is twice

In Operative technique you sad that you need et least 2 cm enough space for two locking pliers. Clarify way is not sufficient one locking pliers. It is role two? Also, longitudinal osteotomy was 10 cm, it is always in of? It depends of bone ingrown of femoral stem, and probably length of femur. I suggest clarify these points during discussion.

I also suggest some instruction for after treatment, according your surgical technique

Quality of written English: Acceptable
Declaration of competing interests:

Dear Editor

I suggest publish this new surgical method after minor corection.

Sincerely

Miroslav Hašpl
