Is the case report persuasive?: Yes

Does the case report have explanatory value?: Yes

Does the case report have diagnostic value?: Yes

Will the case report make a difference to clinical practice?: Yes

Is the anonymity of the patient protected?: Yes

Comments to authors:

In order to make the article more available and more easy to find on search engines, I would use different keywords. It would be very advisable to use the words that are listed in official MeSH library.

E.g. I would use MeSH indexed terms like "stem failure" instead of "stem breakage" or "stem fracture".

Quality of written English: Acceptable
