Is the case report persuasive?: Yes

Does the case report have explanatory value?: Yes

Does the case report have diagnostic value?: No

Will the case report make a difference to clinical practice?: Yes

Is the anonymity of the patient protected?: Yes

Comments to authors:

Nice and interesting paper.
Some minor corrections

1) Introduction - 2nd paragraph
"that the primary indication of CxL..."
I am not a native speaker of the english language, but I think that it should be "indication FOR CxL..."

2) Case presentation 3rd paragraph
"12 months following the PK..."
It should be "Twelve months..."

3) A snapshot of the AS - OCT indicating the demarcation line of the CxL would round this very nice case report off.

**Quality of written English:** Acceptable
