Reviewer's report

Title: Unusual Implant-Related Soft Tissue Reaction: A Case Report

Version: 2 Date: 17 March 2014

Reviewer: Krishna Reddy

Which of the following best describes what type of case report this is?: An unexpected event in the course of observing or treating a patient

Has the case been reported coherently?: Yes

Is the case report authentic?: Yes

Is the case report ethical?: Yes

Is there any missing information that you think must be added before publication?: Yes

Is this case worth reporting?: Yes

Is the case report persuasive?: Yes

Does the case report have explanatory value?: Yes

Does the case report have diagnostic value?: No

Will the case report make a difference to clinical practice?: No

Is the anonymity of the patient protected?: Yes

Comments to authors:

The authors must be congratulated for highlighting a unique presentation of reaction post internal fixation. Only point for further clarification is - was Hydatid disease suspected pre-operatively or only thought of intra-operatively? If it was pre-op, was the patient evaluated for the same? I think this point is important and should be clarified in the manuscript.

Quality of written English: Acceptable

Declaration of competing interests:

No conflicts of interest to declare.
