Reviewer’s report

Title: A new mutation of the PCNT gene in a Colombian patient with Microcephalic Osteodysplastic Primordial Dwarfism type II: a case report

Version: 2 Date: 30 January 2014

Reviewer: Ian Marshall

Which of the following best describes what type of case report this is?: Findings that shed new light on the possible pathogenesis of a disease or an adverse effect

Has the case been reported coherently?: Yes

Is the case report authentic?: Yes

Is the case report ethical?: Yes

Is there any missing information that you think must be added before publication?: No

Is this case worth reporting?: Yes

Is the case report persuasive?: Yes

Does the case report have explanatory value?: Yes

Does the case report have diagnostic value?: No

Will the case report make a difference to clinical practice?: No

Is the anonymity of the patient protected?: Yes

Comments to authors:

Consider whether this report would be better submitted to a genetics journal, rather than the Journal of Medical Case Reports.

Quality of written English: Needs some language corrections before being published
