Comments to authors:

Section Abstract:

1- The title should be more definitive.

2- Oncologic surgeons should be review the surgical technique...what does the authors mean by this?

Section Introduction:

1- “The most common histological type of malignant cervical neoplasms is squamous cell carcinoma. Adenocarcinomas account only for approximately 15% of malignant cervical tumors....” it should be mentioned the percentage of
squamous cell carcinoma.

2- The operative complications should be mentioned in the paragraph.

3- There are many grammatical errors; they should be reviewed by a native speaker.

Section Case Report:

1- The case presentation is well-defined. It will be good if the table is formed for the laboratory results.

2- There is an abbreviation for emergency room but it should be delate.

3- Author should define the aggressive fluid-electrolyte resuscitation.

4- It would be nice to have a figure of the surgical specimen

Section Discussion:

1- There are many grammatical errors, it should be revised by a native speaker

2- The authors should discuss the diagnose options for intestinal obstructions.

Best regards.
