Reviewer's report

Title: An unusual presentation of swollen arm: a case report

Version: 2 Date: 9 October 2013

Reviewer: Scott Stevens

Which of the following following best describes what type of case report this is?: Unexpected or unusual presentations of a disease

Has the case been reported coherently?: Yes

Is the case report authentic?: Yes

Is the case report ethical?: Yes

Is there any missing information that you think must be added before publication?: Yes

Is this case worth reporting?: Yes

Is the case report persuasive?: Yes

Does the case report have explanatory value?: Yes

Does the case report have diagnostic value?: Yes

Will the case report make a difference to clinical practice?: Yes

Is the anonymity of the patient protected?: Yes

Comments to authors:

Drs. Kidd and Broderick have thoughtfully addressed my original concerns with the present revision to the text, which I believe is very much improved. I have only very minor suggestions for further improvements:

In the third paragraph in 'Case Presentation' the AT9 guidelines are cited as making a 2C recommendation FOR compression sleeves. This should read "AGAINST."

At the end of the third paragraph in 'Discussion' "Paget" is misspelled.

Quality of written English: Acceptable
