Reviewer's report

Title: Insulin-induced localized lipoatrophy, preceded by shingles (herpes zoster): a case report

Version: 4 Date: 15 April 2014

Reviewer: Vijay Malpathak

Comments to authors:

I have gone through the revised article and the Cover Letter written by the Authors to Editor.

I found that most of the changes I had suggested in the manuscript have been incorporated by the Authors except for a small correction mentioned below-

In the fourth Paragraph in the case presentation after Introduction in the line "At that time point, lipoatrophy seemed to have improved" may be changed to "At that time lipoatrophy had improved."

The letter to Editor mentions that this has been changed but in the revised article it has not been changed.
