Reviewer’s report

Title: Tuberculous peritonitis in pregnancy: a case report

Version: 1 Date: 6 September 2013

Reviewer: Athanasios Marinis

Which of the following following best describes what type of case report this is?: Unexpected or unusual presentations of a disease

Has the case been reported coherently?: Yes

Is the case report authentic?: Yes

Is the case report ethical?: Yes

Is there any missing information that you think must be added before publication?: No

Is this case worth reporting?: Yes

Is the case report persuasive?: Yes

Does the case report have explanatory value?: Yes

Does the case report have diagnostic value?: Yes

Will the case report make a difference to clinical practice?: Yes

Is the anonymity of the patient protected?: Yes

Comments to authors:

An excellent case report of a rare disease very challenging for the clinician. Authors should correct some points in their case presentation section (such as: 1. replace peritoneal laparoscopy by diagnostic laparoscopy, 2. Poor days should be corrected to four days,,etc) and Discussion section (correct exsudate to exudate).

Quality of written English: Acceptable
