Is there any missing information that you think must be added before publication?: No

Is this case worth reporting?: Yes

Is the case report persuasive?: No

Does the case report have explanatory value?: Yes

Does the case report have diagnostic value?: Yes

Will the case report make a difference to clinical practice?: Yes

Is the anonymity of the patient protected?: Yes

Comments to authors:

Correct scientific names to be highlighted.

"The patient was treated with Praziquantel (Biltricide) 600 mg 8 tabs divided into 2 doses 6 hours apart. She showed immediate marked clinical improvement and most of her symptoms disappeared within 2 days".

Clarify that clinical improvement was probably due to the surgery and not directly from the drug treatment.
