Reviewer’s report

Title: Four successful pregnancies in woman after Fontan palliation: Case report

Version: 2 Date: 21 July 2014

Reviewer: Joerg Stein

Which of the following best describes what type of case report this is?: Unexpected or unusual presentations of a disease

Has the case been reported coherently?: Yes

Is the case report authentic?: Yes

Is the case report ethical?: Yes

Is there any missing information that you think must be added before publication?: No

Is this case worth reporting?: Yes

Is the case report persuasive?: Yes

Does the case report have explanatory value?: Yes

Does the case report have diagnostic value?: No

Will the case report make a difference to clinical practice?: Yes

Is the anonymity of the patient protected?: Yes

Comments to authors:

Very interesting case proofing that Fontan circulation is not at all a contraindication for multiple pregnancies. On the other hand the message would be even stronger if adding a table as overview of all those pregnancies in Fontan circulation reported in the different cited studies. Also a table of the described 4 pregnancies would make the report shorter and give a better overview. Finally a comment on the cultural and religious background in comparison to for example European systems would add an international aspect too.

Level of interest: An article of importance in its field
