Reviewer's report

Title: Hypocomplementemic urticarial vasculitis syndrome with arthropathy, cardiac valvulopathy, and membranoproliferative glomerulonephritis: A case report.

Version: 2 Date: 8 August 2014

Reviewer: Valeria Mazzi

Which of the following following best describes what type of case report this is?: Other

If other, please specify:

Presentations, diagnoses and management of rare disease

Has the case been reported coherently?: Yes

Is the case report authentic?: Yes

Is the case report ethical?: Yes

Is there any missing information that you think must be added before publication?: Yes

Is this case worth reporting?: Yes

Is the case report persuasive?: Yes

Does the case report have explanatory value?: Yes

Does the case report have diagnostic value?: Yes

Will the case report make a difference to clinical practice?: Yes

Is the anonymity of the patient protected?: Yes

Comments to authors:

The work is well done and detailed.
However, I would have also included data on any family history of autoimmune diseases, therapies performed at the onset of urticarial lesions and joint pain.

Level of interest: An article of importance in its field
Quality of written English: Acceptable
