Reviewer’s report

Title: Microscopic identification of possible Clonorchiasis/ Opisthorchiasis Infection in Two Ghanaian Women with an Undiagnosed Abdominal Discomfort: A Case Report

Version: 4 Date: 27 August 2014

Reviewer: De-Hua Lai

Which of the following following best describes what type of case report this is?: Presentations, diagnoses and/or management of new and emerging diseases

Has the case been reported coherently?: Yes

Is the case report authentic?: Yes

Is the case report ethical?: Yes

Is there any missing information that you think must be added before publication?: No

Is this case worth reporting?: Yes

Is the case report persuasive?: Yes

Does the case report have explanatory value?: Yes

Does the case report have diagnostic value?: Yes

Will the case report make a difference to clinical practice?: Yes

Is the anonymity of the patient protected?: Yes

Comments to authors:

1. Figure is not labeled clear (no A or B). In Fig legend claims Bar=120µm, which is not true.

2. There are still many typos in the text. eg, "opisthorchis" should be Opisthorchis in italic. "clonorchis” should be Clonorchis in italic.

Level of interest: An article of importance in its field
Quality of written English: Needs some language corrections before being published
